DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claim 1-25, drawn to a digital camera with various gradation changing modes, classified in class 348, subclass 229.1.
 - II. Claims 26-28, drawn to a digital camera with a pixel addition mode and analog to digital conversion in which a maximum quantizing level is set in accordance with the pixel addition mode, classified in class 348, subclass 222.1.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as a digital camera which sets a gradation mode (i.e. standard, soft or hard) to change the properties of picture taking without the use of pixel addition. Invention II has separate utility as a digital camera which uses pixel addition to decrease the resolution of the captured image without the user setting a gradation mode (i.e. standard, soft or hard). See MPEP § 806.05(d).
3. Because these inventions are distinct for the reasons given above and the search required for Group II is not required for Group I, restriction for examination purposes as indicated is proper.

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
